### Editorial

## Inaugural Issue Editorial Note

### Md Aminul Islam\*

*Department of Physical and Geological Sciences, Faculty of Science, Universiti Brunei Darussalam, Jalan Tungku Link, Gadong BE1410, Brunei Darussalam.*

European Journal of Geosciences (EJGS) covers peer-reviewed publications having high quality research and analysis on all aspects of Geosciences. European Journal of Geosciences will feature a full range of articles such as communications, full papers, review articles, mini-reviews, letter to the editor, opinions as well as technical keynotes, methods and methodologies. The aims of EJGS are to become a leading international peer-reviewed academic journal that encompasses major research areas of geology, geochemistry, hydrology, hydrogeology, petroleum sciences, environmental management, climate and environment, paleo-environments, physical geography, GIS and remote sensing, geophysics, mineralogy, tectonics, sedimentology, paleontology, environmental geology, petrology, natural risks (earthquakes, tsunamis, floods, droughts...), volcanology, geo-archaeology, oceanography, geo-tourism, geomorphology, geodesy, glaciology, soil sciences, speleology and paleoecology. The scope of the journal is not limited to these subjects or research areas, any other topic related to Geosciences can be submitted.

Interdisciplinary research and communication between diverse expert communities drives the creation of the future technologies. EJGS is commissioned with a view to creating new knowledge, nursing young researchers, making bridge between naïve and experience researchers, acting as a catalyst to promote and share innovation, works, and achievements to go beyond! Geoscience research is highly related to earth resources exploration, development and management; it also deals with disasters, climate change and interaction between human and natural phenomenon. Mitigation of natural hazards, resource management and cost effective environment friendly technology is a crying need for sustainable development. To win over the upcoming challenge, government and people of all classes should work hand in hand to make this planet as a better living place for future generation. EJGS and its dedicated editorial team are striving for excellence and always be a part of world community to overcome the upcoming challenges.

As Editor-in-Chief, I would like to take this opportunity to thank the members of our Editorial team, who trusted this adventure. Editorial team will be particularly concerned by maintaining high international scientific standards of any single post published in European Journal of Geosciences, through a careful examination, peer-reviewing process, and article selection. Second objective is selecting and bringing out innovative studies making the Journal as a source of inspiration for researchers. I would like to thank Dr. Sajjad Hossain, founder of the European Academy of Applied and Social Sciences (EURAASS) for his trust and his perseverance, without whom this scientific adventure would not have been possible. We would like to thank our authors, their trust and hard work in disclosing their latest research, our referees in their impartial effort for keeping the highest international scientific standards, and you, our readers, for your interest and support. We are proud to propose the inaugural issue of European Journal of Geosciences, and we specially thank the contributors for their first efforts.

  
Dr. Md Aminul Islam  
Editor-in-Chief
